Critical Note on Intellectual Property

“All Intellectual Property (IP), including source code, algorithms, and trademarks, is fully consolidated and owned by the ADGM Holding Company to ensure maximum asset protection and investor security.”

This note underscores the robust framework in place to protect all proprietary assets under the ADGM Holding Company, providing investors with assurance regarding the security and centralized ownership of Noble OS’s core intellectual property. The

operational entities function as direct extensions, facilitating market-specific activities while IP remains securely held at the top level.
